

Experience

Elastic · Principal Product Manager

Aug 2016-Present

Elastic · Senior Product Manager

Aug 2015-Aug 2016

- Principal Product Manager for Elastic's flagship product, Elasticsearch: an enterprise-grade open-source distributed NoSQL/search/analytics engine downloaded 50 million times.
- Responsible for roadmap, internal (e.g. sales) enablement, positioning, competitive analysis, conference & meetup presentations, customer requirement & feedback gathering, and recommendations on partnerships and new product licensing/pricing.
- Working closely with over 40 engineers across 13 countries.
- Helped plan and execute against a variety of major new features including a home-grown scripting language, new data ingestion products, a performance profiler, as well as company-wide projects such as a complete website design and all-new sales enablement.

JSparks · Founder, Technical Lead

Apr 2014-Aug 2015

- Developed software and curriculum to teach children how to program using robots.
- Oversaw and contributed to development: an Android app and back-end LAMP stack.

HP Software · Senior Product Manager

Oct 2012-Apr 2014

- Only Product Manager for HP Big Data's flagship product, IDOL: a B2B search application, NoSQL engine, audio and image recognition platform, all based on machine learning.
- Implemented Agile in organization, owned roadmaps, end-of-life and deprecation initiatives, enhancement request/escalation procedures, personas, user story creation/prioritization, and marketing plans.
- Scoped and helped design new products/features including a new admin interface, use-case focused documentation, and data distribution algorithms.

Autonomy: Acquired by HP Software · Senior Technology Architect, Manager

Oct 2010-Oct 2012

- Lead infrastructure architect & acting technical product manager for mobile augmented reality app called Aurasma.
- People manager in consulting division, seeing over delivery of SOWs, RFPs, and customer solutions. Regularly built into and used 3rd party systems and helped define product requirements for customer needs.
